

## Tower Semiconductor Recognized by Northrop Grumman with Supplier Excellence Award

**MIGDAL HAEMEK, Israel, March 17, 2025** – Northrop Grumman Corporation (NYSE:NOC) has recognized Tower Semiconductor as one of its top supplier partners during the company's Supplier Excellence Awards Ceremony held recently.

"Tower Semiconductor has supported Northrop Grumman in delivering technologies that enhance national security for the U.S. and our allies," said **Ken Brown, Vice President, Enterprise Global Supply Chain, Northrop Grumman**. "The high-quality performance, dedication and partnership of our supplier teams drive operational excellence to ensure warfighters have next generation advantages in advanced weapons, aircraft, missile defense and space."

Recognized for *Performance Excellence*, Tower Semiconductor is instrumental in supporting Northrop Grumman with delivering innovative and cost-effective military and security solutions to give its customers a competitive advantage in a complex field.

"It is an honor to once again receive the Northrop Grumman Supplier Excellence Award. This recognition underscores Tower Semiconductor's unwavering commitment to delivering exceptional quality, reliability, and service to our Aerospace & Defense customers," said **Mike Scott, Sr. Director and General Manager of Aerospace & Defense Business Unit, Tower Semiconductor**. "We take great pride in supporting Northrop Grumman and the broader defense community with our advanced technologies, manufacturing capabilities and dedicated A&D organization."

### About Tower Semiconductor

Tower Semiconductor Ltd. (NASDAQ/TASE: TSEM), the leading foundry of high-value analog semiconductor solutions, provides technology, development, and process platforms for its customers in growing markets such as consumer, industrial, automotive, mobile, infrastructure, medical and aerospace and defense. Tower Semiconductor focuses on creating a positive and sustainable impact on the world through long-term partnerships and its advanced and innovative analog technology offering, comprised of a broad range of customizable process platforms such as SiGe, BiCMOS, mixed-signal/CMOS, RF CMOS, CMOS image sensor, non-imaging sensors, displays, integrated power management (BCD and 700V), photonics, and MEMS. Tower Semiconductor also provides world-class design enablement for a quick and accurate design cycle as well as process transfer services including development, transfer, and optimization, to IDMs and fabless companies. To provide multi-fab sourcing and extended capacity for its customers, Tower Semiconductor owns one operating facility in Israel (200mm), two in the U.S. (200mm), two in Japan (200mm and 300mm) which it owns through its 51% holdings in TPSCo, shares a 300mm facility in Agrate, Italy with STMicroelectronics as well as has access to a 300mm capacity corridor in Intel's New Mexico factory.
